

RACE AND SCHOOL CULTURE: A FIVE PART DEEP DIVE

Session Four Follow Up: March 2021

While working with your own school groups, consider using any of the following prompts for conversation:

- What resonated with you?
- What surprised you?
- Is there some aspect of the work described which you can envision implementing in your own school?
- What are the next two steps for someone (are you able to name that person?) to take in order to get that ball rolling?
- Can you imagine tweaking/adjusting/customizing something described so that it might work in your own school?
- What, if any, challenges do you envision?
- Which team members might you want to involve in order to move something forward?
- What else would you ask the presenters if you had more time with them?
- On a readiness scale of 1-10, 1 being “not at all ready” and 10 being “absolutely ready”, how ready do you think your school is to undertake work similar to or inspired by the work which [*insert name of presenter*] described?
