KNOWLEDGE CENTER USER GUIDE

Welcome to Prizmah's Knowledge Center! We are delighted you are here. There are multiple ways to find resources on the Knowledge Center. This user guide will outline them.
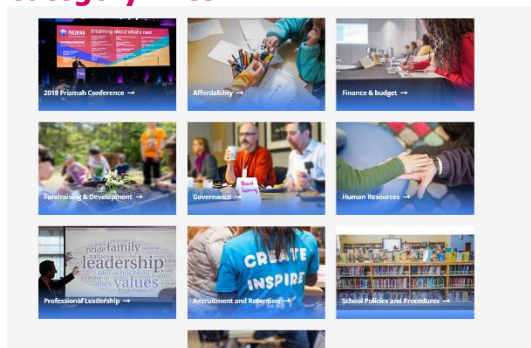

The Search Bar

If you know what you are looking for, try typing it in the search bar. Press the magnifying glass to search.

Alternatively, you can browse from the search bar by clicking the down arrow located after "All Topics."

Category Tiles

To browse through the category tiles, click on the topic you are interested in. You will see curated resources on that topic.

Filters
The Knowledge Center contains three types of search filters.

Topics

If you are browsing through a category, you can refine your selection by choosing a subcategory of the main category you are looking in. Click on the down arrow next to "All Topics" and the subcategories will appear.

Date

If you are looking for a particular resource that you saw years ago or very recently, you may want to try to the date filter. Click the down arrow next to "When" and you will see options to sort by time frame.

Genre

This filter allows for a user to filter for a particular type of content. The options are research, case studies, HaYidion-journal, Templates, and Video. Click on the down arrow next to "Document Type" and the available document types to filter in your results will appear.

Condensed View

Condensed view will change the appearance of the results and does not include the resource description. To view the condensed view, click on the three lines.
